JETI model

JES controllers

(with BEC)

JES 10,20,30,50, speed controllers are suitable for electric powered models.
Compact , small, most efficient - these are JES controllers.

Type	Weight with wires	Power continuous	Brake	Application
JES 10	12 g	10 A	yes	380, 400 motors folding prop
JES 10 AKRO	11 g	10 A	no	380, 400 motors
JES 20	15 g	20 A	yes	540, 550 motors folding prop
JES 20 AKRO	14 g	20 A	no	540,550 motors
JES 30	16 g	30 A	yes	600, ASTRO 05 motors
JES 50	26 g	50 A	yes	Sm-Co motors

Features:

- SMD- technology
- BEC - Battery Elliminator Circuit
- PCO- Power Cut Off
- HEC- High Efficiency Clock / 3000 Hz
- POR- Power On Reset
- TOP - Temperature Overload Protection
- Curent Limiter
- Operating range 6 - 10 cells

Controlers are delivired with Futaba or Graupner (JR) wires.

Graupner	Futaba	
brown	black	minus
red	red	plus
orange	white	impuls

It is possible to set the moment of motor start. If it is necessery turn potentiometer slowly and softly. Do not drop potentiometer with anything!
To achieve good cooling do not pack the controlleres to foamrubber.

JETI model - wishes you many happy landings!
